

Brownfields 2015 Assessment Grant Fact Sheet

Regional Planning Commission, Southeastern Louisiana

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Assessment Grants

\$200,000 for hazardous substances

\$200,000 for petroleum

EPA has selected the Regional Planning Commission for two brownfields assessment grants. Community-wide hazardous substances and petroleum grant funds will be used to conduct eight Phase I and six to eight Phase II environmental site assessments. Grant funds also will be used to develop four to six cleanup plans and support community outreach activities. The focus of these grants is on two target areas: the LaFitte Corridor in New Orleans and the St. Claude Avenue Commercial Corridor, which connects New Orleans' Ninth Ward and Holy Cross neighborhoods with St. Bernard Parish.
